- V. Should be at least 5/10 with English: Good Communication Skills, English verbal and Written Skills
- VI. Should be at least 3/10 with Linux: Basic to Advance Linux Knowledge

**b) Basic Study Material message for now:**

Linux/PBX/Networking applicant:

We work on a LAMP platformed software called asterisk:

"Asterisk" is an open source PBX which runs on trunk interfaces such as GSM / PRI / SIP PRI / Analog and VoIP, Basic ingredients of any telephony are Extensions and Trunks ( thereby generating other nomenclatures such as DID , VoIP , SIP , H.323 and Hardware such as IP Phone , GSM Gateway , PRI Card , FXO , FXS etc. )

Application that industry uses as a structure is another open source application called "viciial"

This is what you need to do for your learning and candidature with us:

1) Install VM for vicibox and configure extension + user and then a VoIP trunk  
(Simplest since domestic calling options shall not be available with you since dependent on hardware, PFI the username, password and IP (for VoIP trunk) once you install vici and configure the Extension)

Username -- 12132999999

Pass: AIC\_Intern\_1234

IP -- 136.243.22.181

First test: Have a 30 sec call with our US number: +14087913820 and share recording:

Step 1: Configure Softphone

Step 2: Configure Dialer

Step 3: Call +14087913820

Step 4: Press 5 to enter users' extension and then press extension 4001 (Kartikey)

Step 5: Snapshot with call on interns Whatsapp Group to confirm
